Practica 1: Señales de Tiempo Discreto Flores Chavarria Diego

1. Utilice Matlab para generar y graficar las siguientes secuencias:

a.
$$x_1(n) = 3\delta(n-3)$$
 $0 \le n \le 10$

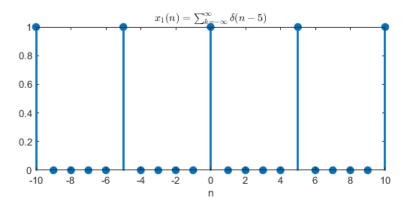

b.
$$x_2(n) = 5\delta(n-5)$$
 $0 \le n \le 10$

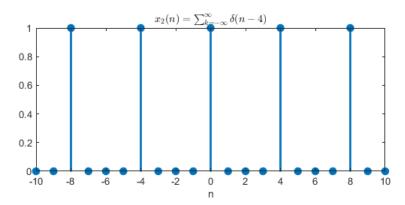

2. Utilice Matlab para generar y graficar las siguientes secuencias:

a.
$$x_1(n) = \sum_{k=-\infty}^{\infty} \delta(n-5k)$$
 $-10 \le n \le 10$

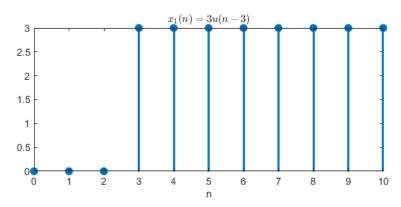

b.
$$x_2(n) = \sum_{k=-\infty}^{\infty} \delta(n-4k)$$
 $-10 \le n \le 10$

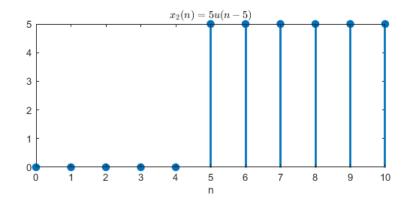

3. Utilice Matlab para generar y graficar las siguientes secuencias

a.
$$x_1(n) = 3u(n-3)$$
 $0 \le n \le 10$

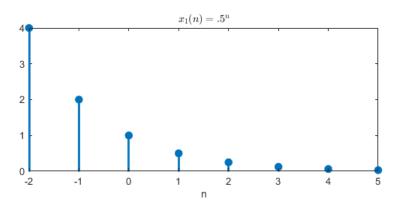

b.
$$x_2(n) = 5u(n-5)$$
 $0 \le n \le 10$

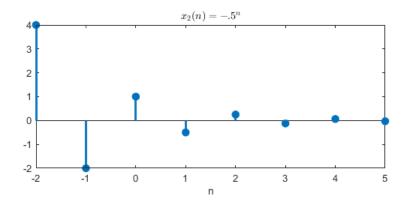

4. Utilice Matlab para generar y graficar las siguientes secuencias

a.
$$x_1(n) = (.5)^n - 2 \le n \le 5$$

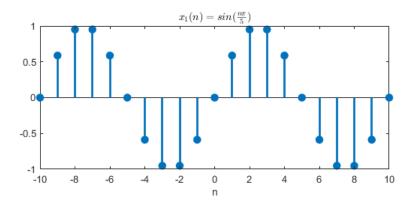

b.
$$x_2(n) = (-.5)^n - 2 \le n \le 5$$

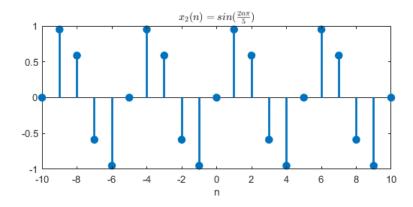

5. Utilice Matlab para generar y graficar las siguientes secuencias

a.
$$x_1(n) = \sin(\frac{n\pi}{5})$$
 $-10 \le n \le 10$

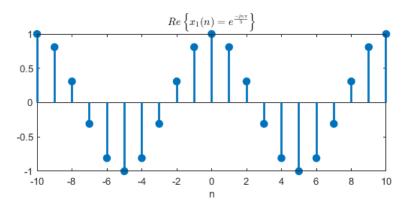

b.
$$x_2(n) = \sin(\frac{2n\pi}{5})$$
 $-10 \le n \le 10$

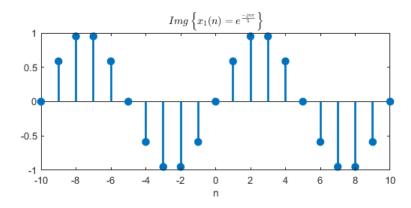

6. Utilice Matlab para generar y graficar las siguientes secuencias.

a.
$$x_1(n) = e^{-jn\pi/5}$$
 $-10 \le n \le 10$

b.
$$x_2(n) = e^{-jn\pi/5}$$
 $-10 \le n \le 10$
